

Our vision We aim to provide mechanical and mechatronic systems and components, competitively designed and built, to ever advancing efficiency and with ever-increasing ease of installation and use by our customers.

Our History

The Griffiths Components group has been supplying the pneumatics industry world-wide for over 80 years, providing quality products with a high level of service and support. Griffiths Components have grown rapidly to become a complete pneumatics, automation & controls supplier.

The group began supplying and manufacturing hydraulic and pneumatic couplings and connections. Over many decades it expanded into control valves, specialist tubing, Vacuum handling and finally into end-to end automation systems.

Our primary partners:

Camozzi: [Pneumatic automation components] Since early 1998 Camozzi SPA has had Griffiths Components as its representative in Australasia. With the Camozzi range as the core component of our comprehensive range of industrial automation products, Griffiths components can assure customers of highly advanced products. They are manufactured under an ISO 9001 quality system, and are one of the leading manufacturers of pneumatic components internationally. Additionally, Camozzi are also amongst the world leaders in machine tool and high volume industrial transfer equipment manufacture.

Mebra Plastik: [Specialist tubing] Mebra has established itself as an important player in the field of extrusion hoses for hydraulic and pneumatic applications. It is still managed by its founder, with the assistance of second and third generation relatives, and this is one of its distinguishing strengths.

Thanks to more than 30 years of experience, it operates in sectors requiring and imposing a high level of quality, manufacturing products to special technical specifications with highly reduced tolerances.

The products are manufactured using technologically advanced techniques, equipment and machinery perfectly suited to market requirements, introduced thanks to in-depth knowledge of the industry acquired through years of experience and competent and qualified personnel. All of the products are manufactured using the best raw materials, produced by internationally renowned and industry leading companies.

Tork: [Process valves and actuators] Tork have won quality awards for their engineering of actuators and process valves. The staff of the company work hard to achieve total customer satisfaction. They strive to maintain product excellence and innovation in process valves for many industries including

Gas, steam, fuel and water. As a result, TORK is the leader various markets and more and more famous on the international markets as well.

Vuototecnica: [Advanced vacuum equipment] Vuototecnica is the leading company in Europe in vacuum creation and management technologies.

Innovative capability, unique knowhow in amplitude and articulation and widely established. A reliable engineering partner in robotics and vacuum handling since 1975.

Our values

Consistency: The serve and parts you receive from us today, you can receive again tomorrow, supported worldwide.

Reliability: Both regarding our people or our parts, we back them and you 100%.

Integrity: It is not just a word to us. Honest dealing, fair and consistent pricing. That is what we do.

Our strengths

Perfect balance between price and quality: It is our philosophy to produce quality automation components, which satisfy the requirements of our customers but at a competitive price and backed by a one year comprehensive manufacturing guarantee - puts our many thousands of products in a very strong position in the market place.

Support: Griffiths components believe in stocking well in order to not let down our customers, and exceed their expectations. We offer technical support before and after sales to ensure the simplest system is chosen which meets the requirements, and to ensure installation and servicing runs without a hitch.

Peace of mind: The combination of affordable high quality products, and the back-up of a technically advanced and well established supplier, allow our customers to rely on us and our products and keep their peace of mind.

Australasia and what we bring to it

Market leaders

Griffiths components is the first pneumatic supply company in the region to

offer 24 hour per day, seven day a week stock access and support. Griffiths Components have always been in the forefront of introducing the latest technology to the Australian market. The push-in fitting, in-line actuated valves and locking plate ball valves are just three examples of products Griffiths Components have introduced into the Australasian market for the first time.

Customer Service, Technical and Marketing Support

Griffiths Components are committed to providing our customers with pneumatic system designs offering:

- 24 Hour, seven day a week support and product access.
- The most reliable componentry available.
- C.A.D systems support.
- All pneumatic circuits designed for ease of diagnostic troubleshooting by maintenance personnel.
- Worldwide after sales support.
- Professional Marketing and Product support available for distributors and O.E.M's.
- Comprehensive one year manufacturers warranty.
